

Vetriere Riunite S.p.A. is firmly committed in activities to the purpose to protect environment and has adopted a policy of continuous improvement in environmental impact.

Even though the company has not yet implemented in full ISO 14001 Certification, it manages environmental issues pursuing the following principles:

1. Vetriere Riunite S.p.A. has approved an environmental policy that aims at full compliance with Italian and European legislation concerning environmental protection.
This policy intends to remove dangerous products from the production process and replace them with less hazardous products whenever possible, or at least minimize their use providing appropriate safety measures, as required by D.Lgs.81/08 (Act adopting European directives on safety). A complete list of the used materials is available and safety data sheets are evaluated before using said materials.
2. Each kind of waste is disposed according the current Rules and Acts (D.Lgs.152/2006), the Annual Waste Return is submitted to the relevant authorities. It is company's target to reduce both quantity and hazardousness of its waste. Rules concerning packaging are complied (CONAI).
2. Gas emission and water drain are regularly monitored according current Regulations. A careful accounting of water and energy resources required for manufacturing enable the optimization of their use aiming at the continuous improvement.
3. All waste are shipped to recycling or reused if possible (paper, cardboard, plastic, various metal, oil, glass, old PCs, etc.).
4. Information and awareness of environment topics are emphasized among all employees. The environmental management system is based on standards of quality management system.
6. The products of Vetriere Riunite S.p.A. meet the International Standard ISO 7086 referring to release limits for lead and cadmium; Further, they meet the Ministerial Decree dtd. March 21st 1973 governing materials used for food packaging as well as Directive RoHS.
